

CAR WORKSHOP LIFT TABLE FOR EV BATTERIES

A safe and solid lift

In line with the car industry's development of sustainable electric and hybrid cars Power-Lift offers a flexible solution for handling ev battery replacement from the underside of the car. 4 castors allow easy moving along the floor and the electric panel allows safe lifting.

The lift table can help in several other areas of the workshop as an adjustable height work station.

Type:	POWER-LIFT EL14-170YXM
Capacity:	1400 kg. evenly distributed
Platform:	1800 x 800 mm symmetric over bottom frame
Bottom frame:	1800 x 800 mm service support posts 4 castors with brakes clearance for pallet trucks
Closed height:	550 mm
Stroke:	1150 mm
Total height:	1700 mm
Lift speed :	ca. 38 mm/sec.
Power pack:	0,75 kW 3x230/400V 50 Hz with 3 liters oil tank Bosch-Rexroth 24V DC control voltage
Hold to run:	Up fast Up slow Down Emergency Stop 3 m cable

Standard: DS/EN ISO12100 + relevant parts of EN1570-1
Country of supply: Denmark. Info@powerlift.co.uk
